As healthcare initiatives like Value-Based Purchasing and Physician Quality Reporting Systems drive healthcare reform, unique clinical and IT challenges will continue to grow. Having a quality, reliable system that delivers long term business value to all key decision makers is of critical importance.

Comprehensive End-To-End Solution For An Endoscopy Suite

endoPRO iQ® is a technology platform designed to support the workflow requirements of all stages of an endoscopy suite. The system is designed to take advantage of PENTAX Medical’s unique EPK-i® processor technology, leveraging superior image quality and data collection for clinical and productivity reporting.

endoPRO iQ® provides a simple, integrated and semi-automated clinical and lab productivity reporting process that can be completely user-customized to meet your unique data management needs. Physicians and nursing staff can manage patient scheduling and tracking from arrival to discharge, archive procedure information, generate procedure / GI unit reports and easily capture and annotate procedure images.

endoPRO iQ® offers an extended PENTAX Medical suite of clinical and data management utilities. These utilities can be added as modules to your endoPRO iQ® system:

- Doc-U-Scribe
- Nursing Notes
- Motion Picture Studio
- Vitals Monitoring Integration

**Simple:**
Interface is easy to use, fully customizable

**Fast:**
Streamlined process generates variety of procedure reports

**Connected:**
Seamless integration with existing facility IT environment
Quality Reporting, Efficiency and Utilization Metrics

The endoPRO iQ® Database Reporting Tool, i-TRAC®, enables generation of quality and productivity reports that assist in running an endoscopy unit more efficiently and reduce the multi-year cost of ownership.

endopro IQ® is cross-platform compatible (independent of the endoscope vendor) providing a full integration into a wider hospital ecosystem. The software platform interfaces easily with other clinical information and scheduling systems and integrates seamlessly into hospital EMR systems, delivering quality results via certified interface to national registry.

Customer Testimonial

“PENTAX’s endoPRO iQ® software and features record and save images, provide a template for physicians to enter their post procedure reports, provide patient discharge instructions, and track patient visits. It allows us to do so much and I know that we are not using it to its potential ....”

— Rowena Radich, RN, manager of Washington Outpatient Surgery Center’s Gastrointestinal Endoscopy Center, Fremont, CA

Customer Testimonial

“The program allows us to easily pull all monthly data for submission in seconds! As we begin the quality-based procedures funding model this year, the new database has already proven to be critical for coding of endoscopy procedures.”

— Jeanette Bulgin, Clinical Manager, Endoscopy (All Sites), 2F Digestive Disease Clinic GI Investigation Lab, Hamilton Health Systems, Hamilton, Ontario Canada

Customer Testimonial

“We’ve never had an endoscopy platform that integrates so well with our hospital electronic medical record. The ability to complete procedure notes while within the endoscopy room improves my efficiency immensely, and leads to a more detailed procedure note.”

— Jason Samarasena MD, Assistant Clinical Professor of Medicine, H. H. Chao Comprehensive Digestive Disease Center, Division of Gastroenterology and Hepatology, University of California Irvine
When integrated with these additional features, this rich clinical documentation tool improves clinical workflow and lab efficiency by allowing all endoscopy suite stakeholders to focus on maximizing their work productivity and the overall quality of care.
